- Integrated Risk Reporting
- Environmental Management

Connect From Anywhere

Key Features

- Upload documents and photos
- Mobile access from anywhere
- Create custom screens and fields
- Define workflows for each incident type
- Monitor incident visibility with security rules
- Integrate with other SCS applications
- Link to staff databases
- Integrate with other systems
- Fully transparent workflows
- Multi-lingual translations
- Full audit trail
- Document management

Staff Database

Take advantage of experienced SCS solution designers and the world's best cloud computing platform to build practically any custom application tailored precisely to your needs. Whether you are looking to migrate a current spreadsheet-based solution into a fully-fledged software application, or design a new solution from start to finish, SCS will have you up and running in 2-4 weeks.

Build Dashboards & Reports

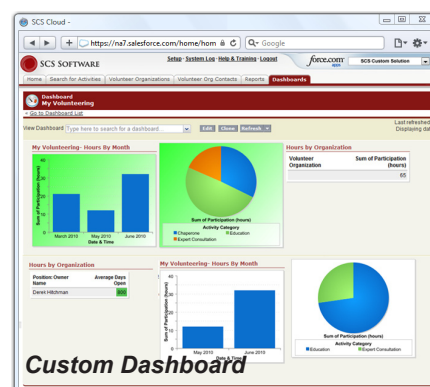

Design and deploy custom dashboards and reports with a straightforward report builder that can access all information in your custom application. Deploy dashboards specific to certain areas or user types and build reports to display exactly the information required.

Continuous Transparency

Respond to executive management, external auditors, regulators and other stakeholders with confidence. All information in the software has a full audit trail and is organized to be comprehensive and easy to understand. This transparent framework allows you to be confident in the accuracy of all reported data, while workflows can be monitored to ensure appropriate approval and sign-offs are fully completed.

Integrate with Company Software

Easy integration with other company systems enables SCS applications to share and report on all relevant data from other business solutions. Link up with HR databases, SAP systems, or other risk management applications to provide a complete view of relevant data.

Confident Reporting

Responses to executive management, external auditors, regulators and other stakeholders are made with full confidence in their accuracy and relevance. All information in the software has a full audit trail and is organized in a comprehensive and easy-to-understand format. This transparent framework allows you to be confident of the correctness of all reported data, while the built-in GRC workflows ensure that all appropriate approvals and sign-offs are taken to completion.

Hosted Platform

All SCS solutions are hosted on the world-class Force.com platform. Simply access the software through the internet for a fast, secure, and reliable experience. The Force.com platform has over 2 million daily users and over 75,000 companies relying on its services. There is no need for installation, no expensive servers, easy access from many devices, and seamless upgrades all of which provide for a faster return on investment.

Benefits:

- No installations or servers
- Certified ISO27,001 security
- Simple integration with other enterprise solutions
- Easy collaboration in one platform
- Infinitely scalable
- No massive capital outlay, fast ROI
- Easily customized
- Seamless upgrades

Custom Reports & Dashboards

Build your own reports and dashboards with the easy-to-use wizard-style report builder. Save reports for other users to view, export to Excel, and design your own dashboards, charts and graphs.

The Force.com Platform

SCS uses Force.com, the world's best platform for cloud computing. Hundreds of standards features included.

Infinite Scalability

Easily scale up from one user to hundreds in the cloud. No servers, no administrators, no hassle.

Lightning Fast Build

Watch your application take shape in 2-4 weeks. Using the cloud and the Force.com platform, SCS can build a complete enterprise application in days.

Experienced Designers

SCS has a dedicated team of experienced designers skilled in best-practice software design in the cloud.

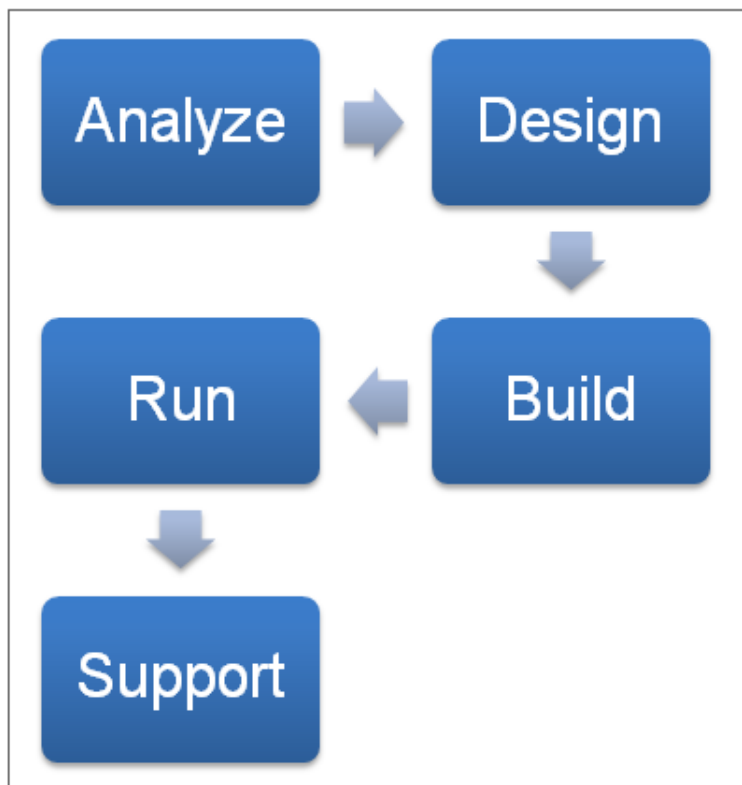

SCS Business Analysts

SCS has a wide range of business analysts with many years experience in risk, security, and compliance.

Atlas Support

By using SCS to build your custom solution, you will be supported by our Atlas Support team who will ensure smooth continued use of your solution.
