

## GRC On-Demand Overview

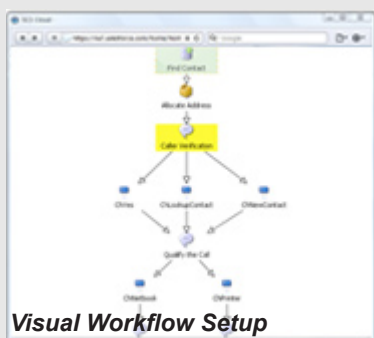

An integrated suite of applications for enterprise Governance, Risk & Compliance

### GRC On-Demand Applications:

- Risk Assessment
- Incident Management
- Custom Solutions

### Standard Platform Services:

- Workflow Functionality
- Screen Customization
- Report & Dashboard Environment
- Email and Task Management
- Multiple Language Support
- Secure Login
- Mobile Accessibility
- User Profiles & Business Structure
- Geographical Information Services (GIS)
- Integration to Other Systems
- Document Management

GRC On-Demand is a fully integrated suite of applications providing the means to achieve best-practice Governance, Risk and Compliance across the enterprise. Each application performs a specific function in the GRC process and all databases integrate to offer comprehensive dashboards and reports. The full GRC On-Demand suite is built on a standard framework which shares services such as workflow, user rights, document management, and a user-friendly reporting framework.

While easy to customize and quick to implement, GRC On-Demand applications are based on best-practice design to meet all compliance standards and provide a guarantee of accuracy in all Governance, Risk and Compliance processes and activities.

### Foundation for Enterprise GRC

The GRC On-Demand suite from SCS lays the foundation for truly enterprise Governance, Risk, and Compliance practices. It provides a centralized database for all risk and compliance information, while integrated performance management allows executives and staff to access and analyze all information in one central system.

### Integrated Risk Platform

All data within the GRC On-Demand suite is fully collated and coordinated. Dashboards draw on information from each SCS application and form an integrated view of the full risk profile. Managers at each level of the organization may view the same information, or selective data specifically for their business area. As a result of this integration, data can be analyzed more thoroughly and with greater clarity.

### Standard Platform Services

All GRC On-Demand applications run on the Force.com platform. Simply access the software through the internet for a fast, secure, and reliable experience. The Force.com platform has over 2 million daily users and over 75,000 companies relying on its services. There is no installation, no expensive servers, easy access from many devices, and seamless upgrades all of which provide for a faster return on investment.

**Force.com Platform Benefits:**

- No installations or servers
- Certified ISO27,001 security
- Simple integration with other enterprise solutions
- Easy collaboration in one platform
- Infinitely scalable
- No massive capital outlay, fast ROI
- Easily customized
- Seamless upgrades

**Custom Reports & Dashboards**

Build your own reports and dashboards with the easy-to-use wizard-style report builder. Save reports for other users to view, export to Excel, and design your own dashboards, charts and graphs.

**Additional Benefits of SCS:**

- Atlas Support System
- Worldwide Partner Program
- Experienced Designers
- Hundreds of Specially Designed Features
- Proven Compliance
- Easy Training Programs

**GRC On-Demand Applications:**

**RISK ASSESSMENT**  
GRC ON-DEMAND

Identify risks to your business, assess them against a defined risk framework, and take remedial action. View all risk information across the business in comprehensive dashboards and reports.

**INCIDENT MANAGEMENT**  
GRC ON-DEMAND

Record incidents throughout the company, automatically assign investigators, track case progress and results, escalate outstanding actions, and drive investigations through to completion. Analyze results and trends and monitor case progress through detailed dashboards.

**CUSTOM SOLUTIONS**  
GRC ON-DEMAND

Take advantage of experienced SCS solution designers and the world's best cloud computing platform to build practically any custom application tailored precisely to your needs.

**Hundreds of Standard Features:**
